In April 2016, a federal court approved a settlement among the United States, five Gulf states, and BP. Under that settlement, BP agreed to pay up to $8.8 billion for natural resource damages. **Florida will receive approximately $680 million of that money.** Below we explain how the money will be spent, who is in charge, what has happened in Florida so far, and how you can participate.

**How will the natural resource damages money be spent?**

The $680 million will be split among 9 different restoration types and monitoring, adaptive management, and administration (MAM and Admin) as follows:

- **MAM and Admin**
  - $700 K spent
  - $29.3 M left
- **Recreation**
  - $55 M spent
  - $28.8 M left
- **Oysters**
  - $5.4 M spent
  - $20 M left
- **Birds**
  - $2.8 M spent
  - $40 M left
- **Marine Mammals**
  - $0 spent
  - $40 M left
- **Sea Turtles**
  - $0 spent
  - $20 M left
- **Water Quality**
  - $17.1 M spent
  - $282.9 M left
- **Nutrient Reduction**
  - $5.3 M spent
  - $29.7 M left
- **Habitat on Federal Lands**
  - $2.8 M spent
  - $14.7 M left
- **Wetlands & Coastal Habitats**
  - $15.6 M spent
  - $5 M left

Note that around $205 M has already been committed to restoration projects and planning, as well as to MAM and Admin costs. That leaves approximately $475 M.

**Who is in charge?**

The natural resource restoration program in Florida is being managed by the Florida Trustee Implementation Group (Florida TIG), which consists of a group of federal and state representatives. When making decisions, the TIG must reach consensus. That means that both the state trustees (who must agree as a group) and the federal trustees (who must also agree as a group) must agree to the decision.
The members of the Florida TIG are as follows:

<table>
<thead>
<tr>
<th>State Members</th>
<th>Federal Members</th>
</tr>
</thead>
<tbody>
<tr>
<td>Florida Department of Environmental Protection</td>
<td>U.S. Department of the Interior</td>
</tr>
<tr>
<td>Florida Fish and Wildlife Conservation Commission</td>
<td>National Oceanic and Atmospheric Administration</td>
</tr>
<tr>
<td></td>
<td>U.S. Environmental Protection Agency</td>
</tr>
<tr>
<td></td>
<td>U.S. Department of Agriculture</td>
</tr>
</tbody>
</table>

**Where are we now?**

In February 2018, the Florida TIG approved the [Phase V.2 Florida Coastal Access Project: Final Restoration Plan and Supplemental Environmental Assessment](#), which supplemented an early restoration plan (released prior to the settlement). In June 2019, the TIG released a [draft restoration plan](#) for Phase V.3 of the Florida Coastal Access Project.

In September 2018, the Florida TIG released its Draft Restoration Plan 1 and Environmental Assessment; due to impacts of Hurricane Michael, the TIG extended the time for accepting public comments and spent time gathering additional information about proposed projects. The [Final Restoration Plan 1](#) was approved by the Florida TIG in March 2019.

**How can I participate in Florida?**

There are different ways you can participate. These include:

- **Attend public meetings**: The Florida TIG will host a meeting for the public at least once a year.

- **Suggest project ideas**: The public can suggest project ideas (e.g., on the NRDA trustees’ website or the state website). The public will be notified when the TIG is starting restoration planning, and may be updated on those efforts.

- **Comment on draft restoration plans**: The public will have the opportunity to comment on draft restoration plans as they are released.

- **Other engagement opportunities**: The restoration projects may trigger other laws and regulations that provide the public with opportunities to engage.

- **Sign up for updates**: To keep informed about what’s happening in the Florida TIG (and the rest of the natural resource restoration program), you can sign up for updates at [www.gulfspillrestoration.noaa.gov](http://www.gulfspillrestoration.noaa.gov) (scroll down the page to sign up).

For more information about the Florida TIG, and to find current participation opportunities, visit the Florida TIG’s web page at [www.gulfspillrestoration.noaa.gov/restoration-areas/florida](http://www.gulfspillrestoration.noaa.gov/restoration-areas/florida). You can also contact a representative of the Florida TIG at DeepwaterHorizon@dep.state.fl.us.
