In April 2016, a federal court approved a settlement among the United States, five Gulf states, and BP. Under that settlement, BP agreed to pay up to $8.8 billion for natural resource damages. Texas will receive approximately $238 million of that money. Below we explain how the money will be spent, who is in charge, what has happened in Texas so far, and how you can participate.

How will the natural resource damages money be spent?

The $238 million will be split among 6 different restoration types and monitoring, adaptive management, and administration (MAM and Admin) as follows:

- **Wetlands & Coastal Habitats**
  - $250 K spent
  - $22.3 M left

- **Nutrient reduction**
  - $250 K spent
  - $22.3 M left

- **Sea Turtles**
  - $20 M spent
  - $7.5 M left

- **Birds**
  - $20.6 M spent
  - $20 M left

- **Oysters**
  - $300 K spent
  - $22.2 M left

- **Recreation**
  - $18.6 M spent
  - $0 left

- **MAM and Admin**
  - $1.5 M spent
  - $5 M left

Note that around $107 M has already been allocated to restoration projects and planning. That leaves approximately $131 M.

Who is in charge?

The natural resource restoration program in Texas is being managed by the Texas Trustee Implementation Group (Texas TIG), which consists of a group of federal and state representatives. When making decisions, the TIG must reach consensus. That means that both the state trustees (who must agree as a group) and the federal trustees (who must also agree as a group) must agree to the decision.
The members of the Texas TIG are as follows:

<table>
<thead>
<tr>
<th>State Members</th>
<th>Federal Members</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Texas Parks and Wildlife Department</td>
<td>• U.S. Department of the Interior</td>
</tr>
<tr>
<td>• Texas General Land Office</td>
<td>• National Oceanic and Atmospheric Administration</td>
</tr>
<tr>
<td>• Texas Commission on Environmental Quality</td>
<td>• U.S. Environmental Protection Agency</td>
</tr>
<tr>
<td></td>
<td>• U.S. Department of Agriculture</td>
</tr>
</tbody>
</table>

Where are we now?

In October 2017, the Texas TIG released its “Final 2017 Restoration Plan/Environmental Assessment.” This was the first restoration plan of the TIG. The plan funds 13 projects, costing an estimated $45.8 million. This money will come from two different restoration types: (1) wetlands, coastal, and nearshore habitats; and (2) oysters.

How can I participate in Texas?

There are different ways you can participate. These include:

- **Attend public meetings**: The Texas TIG will host a meeting for the public at least once a year.

- **Suggest project ideas**: The public can suggest project ideas (e.g., on the trustees’ website). Note that, even if project ideas were not submitted in time for the first restoration plan, ideas will be considered for future restoration plans. The public will be notified when the TIG is starting restoration planning, and may be updated on those efforts.

- **Comment on draft restoration plans**: The public will have the opportunity to comment on draft restoration plans as they are released.

- **Other engagement opportunities**: The restoration projects may trigger other laws and regulations that provide the public with opportunities to engage.

- **Sign up for updates**: To keep informed about what’s happening in the Texas TIG (and the rest of the natural resource restoration program), you can sign up for updates at [www.gulfspillrestoration.noaa.gov](http://www.gulfspillrestoration.noaa.gov) (scroll down the page to sign up).

For more information about the Texas TIG, and to find current participation opportunities, visit the Texas TIG’s web page at: [www.gulfspillrestoration.noaa.gov/restoration-areas/texas](http://www.gulfspillrestoration.noaa.gov/restoration-areas/texas). You can also contact a representative of the Texas TIG at TXDWHNRDA@tpwd.texas.gov.
